### Movement Against Smoking by School

Children Progresses.
Supt. LaRowe, when asked this morning about the progress of the anti-cigarette crusade that is being waged by the school authorities, ex-

been strong and has done much to further it. The city police are serving the notices on the tobacco dealers for the

the school authorities.

The chief aim of the movement among the high school boys has been to impress upon the students themselves the need of caution when it comes to smoking. The older boys lave been naked to refrain because of the bad example it sets on the children in the lower grades and for the freshmen and lower classmen in the high school. The prevalence of the smoking habit among the lower grade children is impossible to accurately While the superintendent knows of but few cases where excess ive smoking was directly to blame for failure in studies, he declared there are some such cases to his knowledge and is quite firmly convinced the us of tobacco is in the main a very bad thing for school children.

## COPPER ORE VEIN IS ENTERED AT DEPTH OF OVER THOUSAND FEET IN THE INDIANA SHAFT

Continued From Page Two

day it advanced quite easily above \$8. The buying is on the rumors that the stock will shortly be placed on a dividend basis and also listed on the stock exchange.

Braden is produncing about 600 tons per month, or approximately 17,000,000 pounds annually. This is from shipments of about 1,350 tons of ore daily. This will be increased to 40,000,000 pounds per annum by Feb. 1st next, as by that time the two additional units will be equipped with the mineral seperation process, which has already SUPERIORbeen tried with one unit. This has proven to effect a saving of 80% of the mineral contents as compared with 50% with the mill not so equipped.

Their ore averages about 2% to 3%, which is the riches present known porphyry ore body, and they have, accord-19 59. Sunday school at noon. #### LASALLE-

Contrary to general expectations, La Saile will be re pened in a short while. For some reason, the reopening has been delayed; possibly on account of the shortage of men but we are told that preparatory work is now being put through, and that it is likely December 1st will see active operations at the property.

We understand that rock shipments have been increased the past week, and further that the mineral content of the rock is running much better. All machines are now operating in the west lode and the past week shipments have been coming from this lode. A drift is being run on the vein from No. 1 shaft toward No. 2, and considerable of we gather that drifting on the west lode from No. 2 shaft has not shown any particular results, However this drift being extended from No. 1 to No., 2 shaft is demonstrating that there is rich ground between the two shafts, and this rich shute may be picked up any time by No. 2 shaft.

If the mineral contents of nearly 50 pounds to the ion, as Leing made at present, can be maintained, Superior is a near-dividend payer even with its present limited shipments of 400 tons of rock daily,

#### NEW YORK, NOV. 8, 1912.

Since our last lines, history has been made by the election of the Democratic candidate for the presidency and with the information at this writing of excellent chances be handling close to 2,000 tons of ore daily. At present, of control of the Senate of the United States by the Democratic party which for the first time in many years, will represent a legislature to be held fully responsible for the promotion and adoption of Democratic policies of the fu-

So far as all this may have been reflected in the security market up to this writing, it may be suggested as showing a sentiment as leaning by balance towards bullish expression and it is at least pleasant to observe the tendency that the management decided to continue further drilling. Of opinions expressed by financial and industrial interests runs in the same direction. The sharp declines, however, The new hoist at No. 15 shaft on the Osceola lode went in certain securities which it is anticipated even at this early day may be seriously affected by radical tariff rev sion, perhaps typifies in a fairly concrete manner sentimen developing and which may still further develop as ideas may reach the public, so that all in all, the situation at the moment may be fairly well described as somewhat passive

Other than this, however, husiness is on the boom. Steel mills are sold ahead, pig iron is being made in record-We are told that the rock coming from drifting on the breaking quantities, our agricultural products are moving

### Anty Drudge Joins the Union.

Miss Highbrow-(visiting the Teamsters' Union)-"So you have made my friend, Anty Drudge, an Honorary Member. And why, may I ask?"

Honest Mike-"Well, you see, it's this way, main: I drive a coal wagon, and Gerry over there drives for a wholesale butcher. We get terribly dirty-I all sooty and Gerry all grease and stains. It's the same with all the boys. Anty Drudge told us about Fels-Naptha-how it dissolves the grime and grease; and you only use lukewarm or cool water. Saves money and makes our wives happy."

"Wear" is nothing but "rubbing." Every time you hard rub your clothes against anything, little particles are rubbed away.

Boiling softens the fibre of cotton, linen, silk and wool, and when rubbed hard on the washboard they wear away faster than at any other time.

Try to think how many days of wear are represented by one trip to the oldtime washtub.

Fels-Naptha requires neither boiling water nor hard rubbing. And there is no washboard wear on

the clothes washed the Fels-Naptha way. Fels-Naptha is made to do away with boiling and hard rubbing; therefore if you use it as an ordinary soap, you cause yourself unnecessary work.

Use Fels-Naptha in cool or lukewarm water and it will do all we claim.

It will cut the washday in half, summer or winter, and do silently and effectively all the real hard work.

If you follow the simple directions on the red and green wrapper, you will never return to ordinary soaps and the old-fashioned way of washing.
